

Foxit PDF SDK for Mac Objective-C 6.4 Upgrade Warnings

This document contains a list of items that developers looking to upgrade to Foxit PDF SDK for Mac Objective-C 6.4 from previous version should pay attention to. Changes to code may be required in order for your projects to compile using the new version.

Upgrading to version 6.4 from version 6.3

There are two minor upgrade warnings in this release when moving from version 6.3 to version 6.4.

- The function **FSRenderer::setTransformAnnotIcon** has been deprecated.
- The parameter "**is_transform_icon**" of the function **FSAnnot::getDeviceRect** has been deprecated.

Upgrading to version 6.3 from version 6.2.1

There is only one minor upgrade warning in this release when moving from version 6.2.1 to version 6.3. In this release we worked hard to ensure that no modifications to existing code bases would be required when upgrading.

The function name of **foxit::pdf::interform::Field::SetDefaultValue** has been changed to **foxit::pdf::interform::Field::SetDefaultValue**.

Upgrading to version 6.2.1 from version 6.2

There is only one upgrade warning in this release when moving from version 6.2 to version 6.2.1. In this release we worked hard to ensure that no modifications to existing code bases would be required when upgrading.

Add a callback interface **WidgetEvent** in **FSDocProviderCallback** protocol to execute xfa widget event when you create or destroy xfa widget.
