1.5 About this guide

This guide is intended for developers who need to integrate Foxit PDF Conversion SDK for Node.js into their own applications. It aims at introducing the installation package, and the usage of SDK.

2 GETTING STARTED

It's very easy to setup Foxit PDF Conversion SDK and see it in action! This guide will provide you with a brief introduction about our SDK package. The following sections introduce the contents of system requirements, the installation package as well as how to run a demo, and how to initialize Foxit PDF Conversion SDK.

2.1 System Requirements

Platform	System Requirement	Note
Windows	Windows Vista, 7, 8 and 10 (32-bit and 64-bit) Windows Server 2003, 2008 and 2012 (32-bit and 64-bit)	It only supports for Windows 8/10 classic style, but not for Store App or Universal App. Prerequisites for Node.js 8-20 version.
Linux	64-bit OS <ul style="list-style-type: none">The minimum supported version of the GCC compiler is gcc4.9.4.The minimum supported version of GLIBC is GLIBC_2.17.	Prerequisites for Node.js 8-20 version.

Note:

- Starting from version 1.1, Foxit PDF Conversion SDK supports machine learning-based recognition functionality which can identify borderless tables in PDF documents. By default, it is disabled, if you want to enable it, please make sure the network is connected first.
- For PDF2Office, it supports Windows and Linux platforms. For Office2PDF, it only supports Windows platform currently.

2.2 What is in the package

In this guide, the highlighted rectangle in the figure is the version of the SDK. Here the SDK version is 2.1, so it shows 2_1.

Package for Windows Node.js is named "foxitpdfconversionsdk_2_1_win_nodejs_example.zip", and package for Linux (x64) Node.js is named "foxitpdfconversionsdk_2_1_linux64_nodejs_example.zip". They have the similar structure, so in this guide mainly introduce "foxitpdfconversionsdk_2_1_win_nodejs_example.zip" as an example.

Download the package for Windows Node.js and extract it to a new directory like "foxitpdfconversionsdk_2_1_win_nodejs_example", which is shown in Figure 2-1. The release package contains the following folders:

- doc:** API references, developer guide
- examples:** sample demo
- res:** font-related configuration files

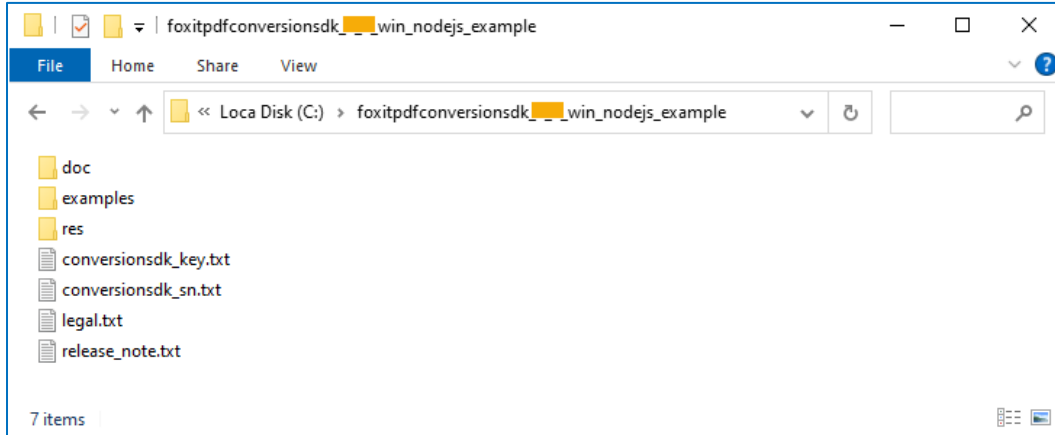

Figure 2-1

Note:

- In "res\metrics_data" folder, it contains the metrics data files which are used to simulate the Office format document typesetting process during PDF to Office conversion. Starting from version 2.1, metrics data will be included in the dynamic library, no manual configuration is required.
- In "res\office2pdf" folder, it contains the resource files which are used to simulate the Office format document typesetting process during Office to PDF conversion.

2.3 How to run a demo

Foxit PDF Conversion SDK provides a pdf2office and an office2pdf demo in the "examples" folder. To run the demos, you can follow the steps below:

- 1) Open a command prompt or a terminal window, navigate to the root directory "foxitpdfconversionsdk_2_1_win_nodejs_example" for Windows, or "foxitpdfconversionsdk_2_1_linux_nodejs_example" for Linux x64, install Conversion SDK nodejs module using the command below:

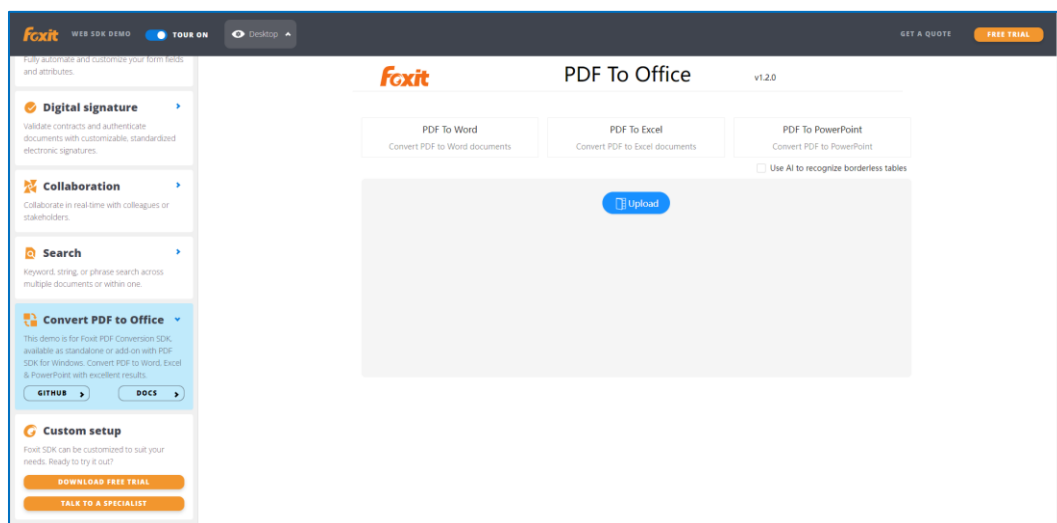

```
npm i @foxitsoftware/foxit-pdf-conversion-sdk-node
```

- 2) To run pdf2office demo, go to "examples\simple_demo\pdf2office" directory, run "node pdf2office.js".

To run office2pdf demo, first you should copy all the files under "res\office2pdf" folder to the directory where the node.exe is located. Then go to "examples\simple_demo\office2pdf" directory, run "node office2pdf.js".

The output files (Word, Excel, PowerPoint, or PDF) will be generated in a folder named by the project name under "examples\simple_demo\output_files\" folder.

Note: Foxit-pdf-sdk-web-demo is an online demo application based on Foxit PDF SDK, which can help users experience the various features and functions of the Foxit PDF SDK. It has added a demo of **pdf2office** function by using Foxit PDF Conversion SDK for Node.js. You can access the foxit-pdf-sdk-web-demo application at <https://github.com/foxitsoftware/foxit-pdf-sdk-web-demo.git>, and experience the **pdf2office** function at <https://webviewer-demo.foxit.com/conversion>.

2.4 How to initialize Foxit PDF Conversion SDK

It is necessary for apps to initialize Foxit PDF Conversion SDK using a license before calling any APIs. The trial license files can be found in the root directory.

```
var sn = " ";
var key = " ";

var error_code = Library.Initialize(sn, key);
if (ErrorCode.e_ErrSuccess != error_code) {
    if (ErrorCode.e_ErrInvalidLicense == error_code)
        console.log("[Failed] Current used Foxit PDF Conversion SDK key information is invalid.");
    else
        console.log("Library Initialize Error: %d", error_code);
}
```

```
return;  
}
```

Note

- The value of "sn" can be got from "**conversionsdk_sn.txt**" (the string after "SN=") and the value of "key" can be got from "**conversionsdk_key.txt**" (the string after "Sign=").
- When initializing Foxit PDF Conversion SDK for Node.js library with the key, it is recommended to store the key on the backend Node.js service instead of exposing it in the frontend code. Storing the key in the frontend code can lead to security issues that attackers can easily access and misuse it.
